

## 4. Perception Seminar in Skagen, Meløya – Northern Norway

Investigating spiritual ecology – Elemental beings - and  
Landscape angel beings – Midnight sun and ourselves

**Tuesday, 23. June (Evening) – Monday, 29. June 2026**

(Arrival Tuesday 23. June; Departure Tuesday, 30. June 2026)

### Mit Mikko Jairi und Christian Bosse

In the areas of perception – phenomenology, etheric world, soul world – and essential spiritual world – we explore the northern Norwegian island of Meløya beyond the Arctic Circle and the never-setting midnight sun. This includes, on the one hand, ether research, study of elemental beings and angels, as well as spiritual ecology; on the other hand, the never-setting midnight sun and ancient elemental being sites are suitable for karmic self-experience! Meløya, with diverse landscape zones on a few kilometers long east-west island above the Arctic Circle, near the Lofoten, offers deep gateways to the spiritual world. There we practice, in community, differentiating imagination, inspiration, and intuition in harmony with applied social and landscape eurythmy.

In addition, we will dive into the myths and stories of Norse mythology – the divine world of the Edda – and surprisingly recognize how closely these are intertwined with the realms of elemental beings and Landscape angekl and the Christ presence of Norway, and what treasures of wisdom can be derived from them, both for a spiritual understanding of nature and for the course of human development – and thus perhaps connected with ourselves – from the perspective of the Norse mysteries. Seminar language: English/German
